Experiences

- Nov 2025 – Present **Researcher**, Collaborative Artificial Intelligence (CAI), Stuttgart, Germany.
I'm a researcher in Human-AI Interaction, focusing on intelligent models.
- Nov 2024 – Present **Founder**, BrAIn, Padova, Italy.
I founded and led BrAIn to profitability by creating custom datasets and designing and finetuning computer vision models for face detection, statue classification, and deepfake generation. I also built the frontend apps and web-apps in Android Studio and Flutter and deployed the full system to production.
- May 2025 – Nov 2025 **Fractional CTO**, Madrid, Spain.
I provided technical leadership for multiple early-stage startups, guiding them in designing and developing MVPs and defining scalable architectures.
- Jan 2025 – May 2025 **Founder in Residence**, Vento Venture, Turin, Italy.
Selected among thousands of applicants to join the Vento Founder Cohort 2025, Exor's VC incubator, where 40 participants come together to build startups, in an environment full of mentoring, workshops, frameworks, and tools that will help the entrepreneur throughout the entire journey.
- Mar 2024 – Oct 2024 **AI Researcher**, Alcor Lab, Rome, Italy.
I worked as a Researcher in AI on a project aimed at collecting street images and predicting car accidents in real time. Specifically, I trained and fine-tuned computer vision models using various techniques to improve prediction accuracy. This project was developed in partnership with Vodafone.
- Sep 2023 – Feb 2024 **AI Junior Researcher**, Florida Atlantic University (FAU), Boca Raton, FL, USA.
I was selected to join a research project at Florida Atlantic University (FAU) focused on crowd counting in the manatee field. I developed a new pipeline to train state-of-the-art models primarily for counting manatees, with the potential to be extended to other animals.
- Jan 2023 – Aug 2023 **Computer Vision Junior Researcher**, Sapienza University of Rome, Rome, Italy.
I was studying and developing the application of generative models (like GANs and other deep learning architectures) in the deepfake space. My research aimed to make these models work on mobile applications for the cultural heritage field.
- Sep 2017 – Dec 2022 **Waiter and Barman**, Spiller, Padova, Italy.
- Jul 2020 – Oct 2020 **Software Engineer Intern**, Atroos srl, Padova, Italy.
I developed both backend (Golang) and frontend (Vue.js) software for clients at a young consulting startup.

Education

- 2025 – Present **PhD scholar, IMPRS-IS** (International Max Planck Research School for Intelligent Systems)

Education (continued)

- 2022 – 2024  **PhD, University of Stuttgart** in Artificial Intelligence and Human-Computer Interaction.
Main research areas: Artificial Intelligence, Theory of Mind, Computer Vision, NLP, Machine Learning and Deep Learning.
- 2017 – 2021  **Master, Sapienza university of Rome** in Artificial Intelligence and Robotics.
Grade: 110L/110.
Main subjects studied: Programming languages, Artificial Intelligence, Neural networks, Computer Vision, NLP, Robotics, Machine Learning and Deep Learning.
- 2012 – 2017  **Bachelor, Università dagli studi di Padova** in Computer Engineering.
Grade: 91/110.
Main subjects studied: Programming languages, SQL, Databases, Math, Hardware, Software, Artificial Intelligence and Statistic.
- 2012 – 2017  **High school, ITC P.F. Calvi** in ICT and Economics.

Volunteering

- Sep 2022 – Jun 2023  **University Buddy for International students**, Sapienza University of Rome, Rome, Italy.
I supported international students by guiding them through study procedures at Sapienza and helping with orientation and social integration.

Research Publications

Journal Articles

- 1 M. Zaramella, X. Zhu, and I. Amerini, “Enhancing manatee aggregation counting through augmentation and cross-domain learning,” *IEEE Access*, vol. 12, pp. 131 148–131 163, 2024.  DOI: 10.1109/ACCESS.2024.3457800.

Conference Proceedings

- 1 M. Zaramella, I. Amerini, and P. Russo, “Why don’t you speak?: A smartphone application to engage museum visitors through deepfakes creation,” in *Proceedings of the 5th Workshop on AnalySis, Understanding and ProMotion of HeritAge Contents*, ser. SUMAC ’23, Ottawa ON, Canada: Association for Computing Machinery, 2023, pp. 29–37, ISBN: 9798400702792.  DOI: 10.1145/3607542.3617359.

Skills

- Languages  Fluent in English and native in Italian.
- Coding  Python, PyTorch, Java, Golang, SQL, HTML, CSS, JavaScript, ...
- Technologies  Linux, Android Studio, Visual Studio Code, CUDA, Flutter, ONNX
- Misc.  Computer Vision, Deep Learning, Artificial Intelligence, Machine Learning, NLP, Robotics, Hugging Face, Math, Team Work, Research, Time Management, Engineer mindset, $\LaTeX$.

Miscellaneous Experience

Awards and Achievements

- 2025  **State Exam for Engineering License**, Rome, Italy.
- 2024  **Honors Master degree**, Sapienza University of Rome, Rome, Italy.
- 2023  **Best Paper Award**, SUMAC Workshop at ACM MM 2023, Ottawa, Canada.

Certification

-  **Google Generative AI course**, Google, Online.
I completed Google's online course on Generative AI, covering both NLP and Computer Vision.
-  **CyberChallenge IT**, CyberSecurity, CyberChallenge IT, Italy.
The CyberSecurity course centered on theoretical and practical activities of attack and defense at the hardware and software level. I was among the 20 selected out of more than 500.
